

## Cleaning Lexi

Some stains can become permanent if not removed quickly. We recommend cleaning as soon as possible after a stain is discovered.

**General Cleaning and Maintenance:** To keep your Lexi faux leather product looking great, it is recommended that a regular cleaning schedule be maintained. Spills and stains should be cleaned up as soon as they appear. Ordinary dirt, smudges and water-soluble stains such as coffee, tea, juice, soft drinks, milk, beer, and wine can be removed with mild soap and water. Use a clean cloth or soft sponge to gently wipe the stain with soapy water. Don't stop there – it's really important to remove any remaining soap solution by wiping the area with a cloth and clean water, and finally to dry the surface with a soft lint-free cloth or towel. Avoid cleaners containing abrasives, as these can damage the product's coating.

**Difficult Stains:** Non-water soluble stains caused by oils, lotions and certain foodstuffs can be cleaned with 50% solution of Isopropyl Alcohol and water. Rinse the cleaned area with water after applying with the alcohol solution. Dry with a clean, lint-free cloth.

**Disinfecting:** A solution of 10 parts water to 1 part bleach may be used as a disinfectant. Wipe the area with a cloth and clean water, and dry thoroughly with a soft lint-free cloth or towel.
