

MOSEHART-SCHLEETER Co. Inc.

Genuine Leather • Vat Dyed • Top Grain

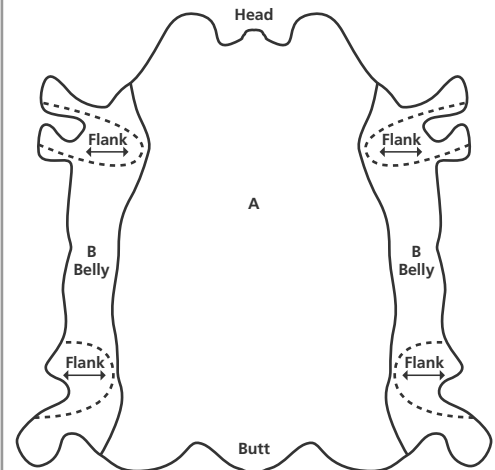

Cutting Instructions for Genuine Leather

A hide of genuine leather is nature's product and caution must be exercised in cutting one. The diagram shows various areas of a hide and they cut as follows:

Section A should be used in cutting seat tops, inside backs, cushion hands and other sections that will receive the most strain and usage of flexing. Section A is the prime portion of hide.

Section B should be used for outside arms, backs hidden bands or any other parts of furniture that will receive little or no flexing. The flank sections must be used on outside backs or nonwearing surfaces in order to avoid trouble. Flank fibers run generally in one direction as indicated by the arrow. In applying flank section to a chair, the first pull should be taken in the direction of the arrow. A stretch at right angles to the direction of the arrow may cause the finish to crack.

Sold by 1/2 Hide or Full Hide

This leather is a top grain, 100% aniline, vat dyed, smooth look leather, with a soft hand, luxurious feel and even coloration throughout all parts of the hide.

Care of Leather*

Genuine leather requires very little care. Regular dusting and vacuuming in crevices or bottoms is all that is necessary to clean your furniture.

Spots & Spills: Wipe excess liquid up immediately with a clean absorbent cloth or sponge. If necessary, use clean luke warm water only and let air dry naturally.

Stubborn Spots & Stains: Use a mild non-detergent soap solution, but no other abrasive. Apply the solution to a clean wet sponge and wash, then rinse well and let air dry naturally.

Never use furniture polish, oil, varnish or ammonia.

* **Caution:** These are suggested methods of cleaning, but there is no guarantee that the results will be completely successful. Use of suggested methods is your responsibility.

Conforms to the following flammability standards**

- MVSS 302
- California Bulletin 117
- Boston Fire Department (BFD 1X-1)

** Data indicated should not be construed to imply the behavior of this or any other material under actual fire conditions.

How to Estimate Leather Requirements

54" Fabric Leather Full hide size approximately 60 sq. ft.
1 yard 18 sq. ft. This equals 3 1/4 yds. 54" fabric
